sage Enterprise Intelligence

Version 8:
A major leap forward in technology and usability

All the features of a great business intelligence tool just got better.

In the office or on the go, Sage Enterprise Intelligence has a new intuitive User Interface that's fully adaptive for any device, and comes with dedicated apps for iOS, Android, and Windows.

Advanced Dashboarding with 100+ visual control features provide users with empowering insight into data for making the right decisions.

Data Warehouse enhancements make consolidating your data from multiple systems easy and efficient, while facilitating the migration to new systems.

Budgeting and forecasting are no longer limited to the web interface, thanks to the write-back capability that is now available with the Excel Add-in.

Seamless integration within your enterprise systems is now easier than ever with new features, including single sign-on, simplified navigation interface, and dynamic filtering.

Update Highlights

- Modernized user interface

- Advanced dashboarding

- Redesigned OLAP for data warehousing

- Fully adaptive interface for mobility

- Excel add-in data entry

- Embeds seamlessly into Sage X3

- Role-based dashboards

- Pre-built templates
